EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 9, 15, 16, 22, 30, and 31 are allowable because the prior art of record does not disclose or reasonably suggest a combination of a language model and a natural language understanding module for speech recognition at a client device, and updating a language model by receiving an update transmitted from a remote server. Generally, distributed speech recognition between a client and a server is well known. However, it is generally not the case that a client device contains both a language model and a natural language understanding module in a client/server architecture because language modeling and natural language understanding are more computationally intensive. Thus, those skilled in the art would expect the more computationally intensive language model and natural language understanding to be performed at a server rather than at a client. A combination of *Thrift et al.* and *Balakrishnan et al.* would meet the limitations of a client device having a language model and forwarding a language model update from a server to a client, but would still omit a natural language understanding module at a client. *Ramaswamy et al.* discloses a natural language understanding unit, but does not suggest placing it at a client in a client/server architecture. By contrast, Applicants' Figure 1 shows a natural language understanding unit at a client. Applicants' invention has an advantage in permitting natural language input at a client while providing for updating of a language model in response to particular tasks.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 14, change "of claim 13" to – of claim 9 –.

The change to the claim dependency of claim 14 corrects an obvious error, as claim 13 is cancelled, and claim 14 is clearly intended to depend upon independent claim 9.
